

**Endurance E3120
Control Solution Retrofit**

Secure your turbine energy production the next 20 years

Is your Endurance E3120 turbine running without warranty after the official bankruptcy of Endurance? Do you want to take full control of your turbine performance and be independent of ERIC™?

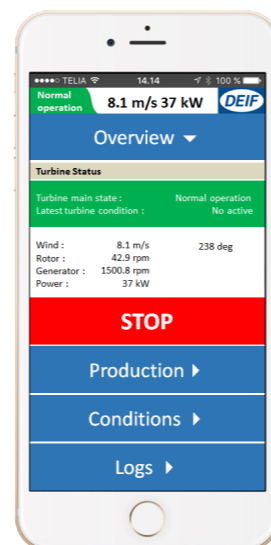

DEIF offers a control solution to secure your investment and your turbine a life time the next 20 years.

Control system solution for Endurance E3120 turbine

Many Endurance turbines have mechanical problems such as over speed braking or turbine stop, which decreases the energy production. DEIF's turbine control system solution is designed with advanced control technology. With improved electrical protection against lightning and surges, your turbine can continue power production instead of stopping in tough weather conditions.

Take full control of your turbine operation

Independent of ERIC™, DEIF's control solution gives you full control of all turbine parameters and settings. You can control your turbine with an application for your laptop or mobile phone.

20 years support and warranty

DEIF Wind Power collaborate in partnership with Spectrum Energy Systems for installation of the new control solution for turbines in UK. Spectrum offers local service and training for turbine owners. DEIF Wind Power Technology offers full support for your turbine including 20 years supply warranty on spare parts.

Benefits

- ▶ No constrains and limitations by ERIC™
- ▶ Constant online overview of your energy production and earnings
- ▶ Full control of your turbine performance and setting with mobile application
- ▶ 5 years standard warranty on DEIF components and 20 years supply warranty on DEIF controller and software

What is the challenge with Endurance turbines?

The E3120 50kW turbine was until November 2016 developed and supported by the manufacturer Endurance Wind Power in Canada. Since 2010, DEIF Wind Power Technology has been supplier of the Thyristor Control Module (TCM-2) for E3120 50 kW turbines and was awarded as best quality single component supplier by Endurance. Today, DEIF Wind Power Technology offers the entire control solution to secure Endurance turbines optimal performance and prolonged lifetime including full support for turbine owners.

Orders placed before July 2017 will be provided with a warranty of 10 years on DEIF components.
